Work Experience

illbethere.in   July 2015 · present

- In charge of building the vacation countdown online service back to front
- Created pure PHP back-end for a shared hosting server environment with borrowed tricks from Laravel and Symfony. PHP 5.3.x and higher supported
- Implemented and tested the best practices from the OWASP guides
- Developed jQuery + vanilla.js front-end class-object oriented app structure
- Not so advanced use of MySQL, but optimized for the poor server the app is running on
- Designed the app inspired by the bossa nova tunes playing in the background
- Implemented data collection/caching structure for Wikipedia, Wikivoyage, Twitter, Pinterest, Panoramio, Flickr, etc. APIs

Sunset Media   July 2015 · present

- Developing custom web applications
- Helping people with PHP, Javascript, less/sass frameworks, MySQL, WordPress and all of the 2.0 and 3.0 web standards and technologies
- Creating WordPress themes and plugins with the latest front/back semantics
- Spreading a positive vibe across all things digital

Humanity Inc. October 2012 · July 2015

- Up to February 2013, served as a full stack soldier on the shiftplanning.com application
- Became a part of the initial front-end team of the humanity.com service
- Accumulated 2+ years of pure front-end experience working with the CanJS framework as it evolved
- Became friends with less, sass and web font technologies
- Fell in love with git source control management along the way
- Worked remotely for 9 months and found all the ups and downs remote work brings to agile (scrum) development

Prelovac Media Jun 2010 · Jun 2012

- Started as a begginer working on all things related to WordPress
- Developed numerous WP plugins and themes, and got familiar with the basic functioning of the web development
- Became part of the core team behind managewp.com
- Worked my ass off for a year and a half in a highly intense start-up environment
- Learned a great deal about work etics and the life/job balance
- Most of all, got to know WordPress source code as the back of my palm with all its limitations, flaws and brilliance

Education

Visoka ICT Belgrade

- Internet technology department 2006 · 2010
- Introduction to a modern programming semantics
- HTML, PHP, MySQL, C++, C#, Visual Basic and of course Java <3

Skillset

Technical strengths

- PHP5 semantics and best practices following the <u>PHP Standard Recommendations</u>
- Native Javascript execution and browser environments
- Git version control system
- <u>Grunt</u> tasks & <u>Gulp</u> streams
- HTML5 layouts with less or sass CSS3 frameworks
- REST api access, and browser quirks on AJAX requests
- WordPress template/plugin development
- MySQL optimizations
- Efficient understanding and debugging of other people's code

Other technical skills

- Apache environment, apache modules and .htaccess tricks
- <u>Composer</u> dependency manager
- <u>MongoDB</u> basics *
- <u>Redis</u> caching basics
- <u>Websockets</u> and realtime app environments
- Node.js basics
- jQuery and related MV Whatever frameworks that are popping out like daisies
- Web design and Adobe Illustrator and Photoshop tools
- Agile software development (Scrum, Kanban)
- <u>Jira</u> <u>Asana</u> and <u>Trello</u>
- .NET environment

* basics meaning: never personally created a production ready app using this technology

Languages

- English - C1 Effective operational proficiency
- Portuguese - B2 Upper intermediate
- Spanish - A2 Elementary
- Serbian - Native
